

Inflatable Vehicle Decon Berm

The Inflatable Vehicle Decon Berms are mobile, flexible systems designed for effective decontamination of vehicles in both field and stationary conditions. Developed for CBRN

response, they provide controlled containment of contaminated liquids, reducing the risk of secondary pollution.

Opis produktu:

Manufactured from durable **EVA technical fabric (1365 g/m²)**, the berms offer high resistance to aggressive chemicals and mechanical damage. **Inflatable side walls (20 cm)** retain decontamination liquids and contaminants, ensuring safe collection during operations. The material is additionally protected with a **UV-resistant coating** for extended outdoor durability.

The system enables rapid deployment—simply unfold and inflate the pneumatic walls, with no tools required. Its lightweight, foldable design ensures easy transport and compact storage. All critical joints are produced using **high-frequency (HF) welding**, ensuring tightness and long-term reliability. The product is suitable for repeated use and is covered by a **3-year warranty**.

Key Features

- Mobile solution for vehicle decontamination (CBRN environments)
- Durable EVA fabric (1365 g/m²) with high chemical resistance
- Inflatable side walls (20 cm) for effective liquid containment
- Prevents secondary contamination
- Rapid deployment - installation in minutes, no tools required
- Compact, foldable and easy to transport
- UV-resistant material for outdoor use
- High-frequency (HF) welded seams
- Custom sizes available (free quotation)
- 3-year warranty

Primary Applications

CBRN response • Military operations • Fire and rescue services • Civil protection • Vehicle decontamination • Disease control (ASF, FMD) • Mobile decontamination units

Technical data

Specification	Value
Product Type	Mobile decontamination mat with inflatable walls
Application	Vehicle decontamination
Design	Flexible basin with pneumatic side walls
Wall Height	0.20 m
Main Material	EVA technical fabric
Material Weight	1365 g/m ²
Chemical Resistance	High resistance to aggressive substances
UV Protection	Protective coating
Assembly	Inflate pneumatic walls (no tools required)
Mobility	Foldable, easy transport and storage
Joint Technology	High-frequency (HF) welding
Warranty	3 years
Country of Manufacture	Poland
Custom Sizes	Available

Available SIZES

Capacity	Dimensions (L × W × H)
6,690 L	9.62 × 3.66 × 0.20 m
12,508 L	12.66 × 5.20 × 0.20 m

Product-Market Insight

The Inflatable Vehicle Decon Berms are designed for rapid-response decontamination where mobility, speed and containment control are critical. They are widely used by emergency services, military units and civil protection organisations operating in contaminated environments.
